

# Downloading the VPN Client and Connecting to the CIS Domain

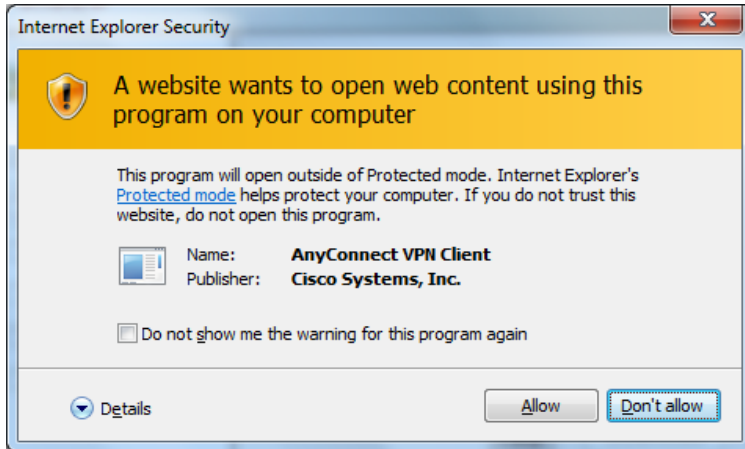

---

1. Click on the link: <https://connect.wtamu.edu/+CSCO+/logon.html> . You should see the screen below:

2. Enter your student username and password i.e. this is the same as the credentials you use to access WTCLASS.

3. If you are using Windows 7 or Windows Vista the security warning like the one below should show up, click "Allow"

4. The client should download automatically, but if it does not, click on the "Download" button.
5. If the client was downloaded successfully you should see a  sign at the bottom right corner of your screen (on the tray). You should also see a screen similar to the one below:
