

Microsoft Visual Studio– Line Numbers

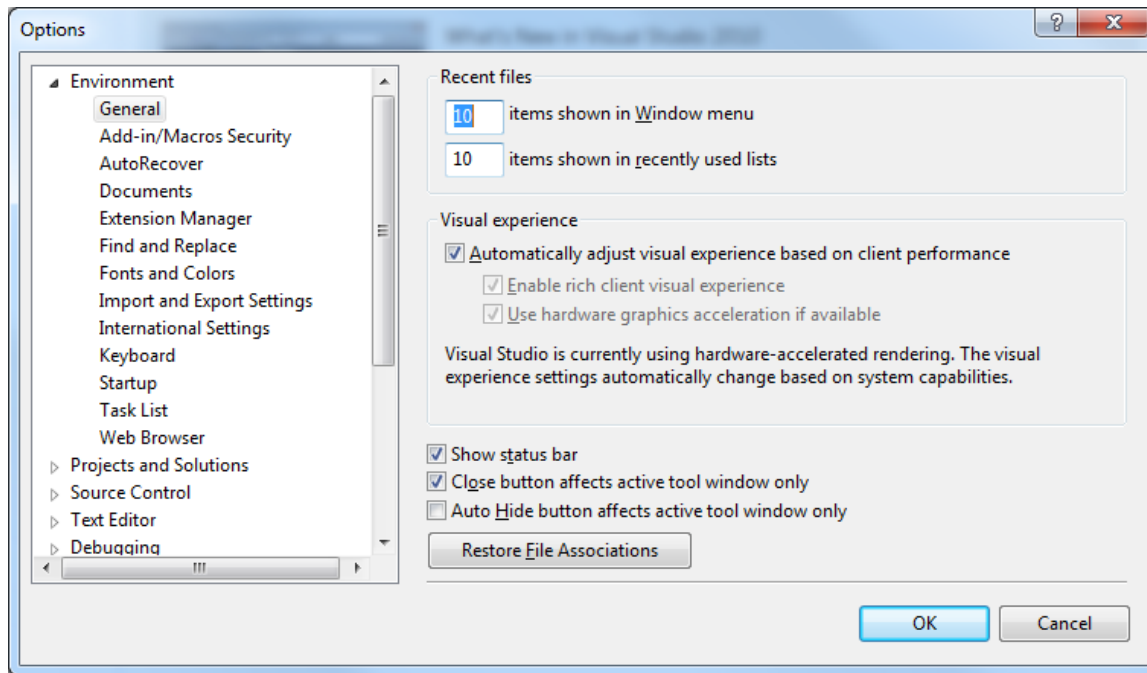

Step 1: Navigating Visual Studio toolbar

- After opening Visual Studio click on the tab “Tools” located in the toolbar
- Click on “Options...” under the tools tab. It should be the last option on the tools tab

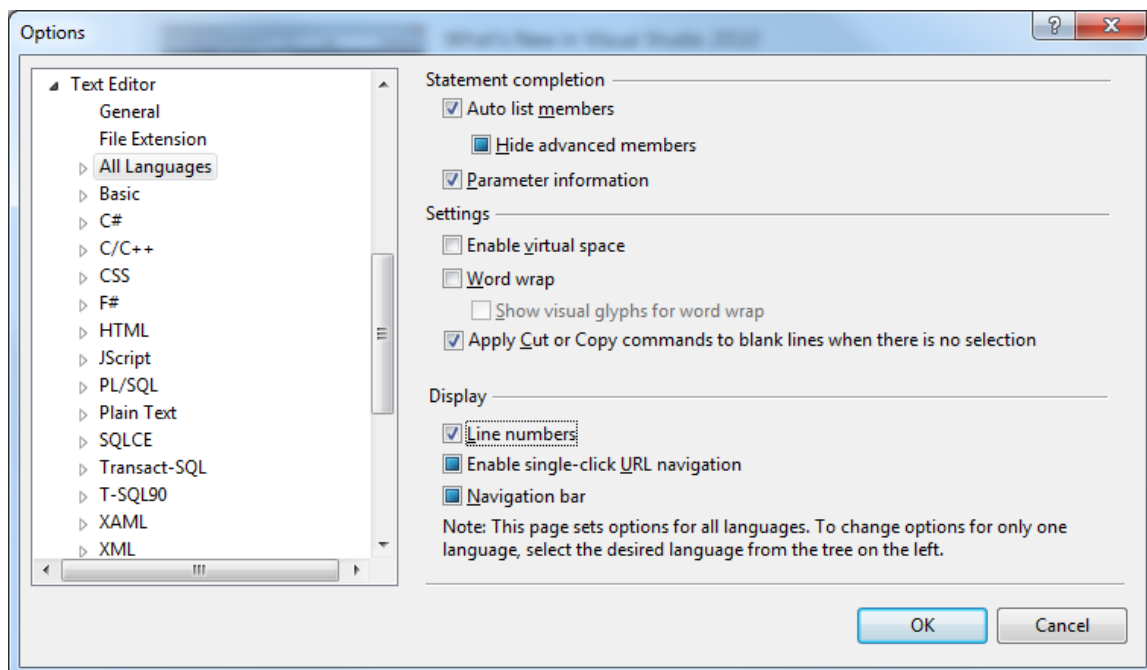

Step 2: Using the Options menu

- Once the options menu is open, click the “Text Editor” tab

Step 3: Using the Options menu

- After it is open click on “All Languages” and you should see the following screen.
- To turn on the line numbers check the “Line numbers” check box and click “OK”.

You're finished! When you open any project they should now display the line number.
